

**BALTIC
CARRIER**

Let us carry your heavy loads

Baltic Carrier is inspired by the Baltic region's proud heritage of trade, transport and industry - a legacy of movement that still shapes how we design and build today. Developed in Denmark and manufactured entirely in-house, including the hydraulic pump.

Baltic Carrier brings together more than 50 years of experience to create a new generation of 100% stainless steel multilifters for demanding industries.

Created for sectors such as food and pharmaceuticals, Baltic Carrier stands for hygiene, durability, easy handling and reliable daily performance. Built to move heavy loads - and to make the working day easier for the people behind them.

Stainless steel pallet truck ML200

Built for businesses that require strength, flexibility and uncompromising hygiene in one dependable solution. Designed for demanding day-to-day use, it is easy to clean, easy to handle and ready to meet the specific needs of modern production environments.

- Available in many different sizes
- Can be custom made for specific purposes
- Special applications such as fishboxes and meatcontainers
- Designed for use in the food and pharmaceutical industries
- Easy to clean
- 2-year warranty on the truck
- 4-year warranty on the hydraulic pump

Stainless steel electric high lifter ML300

Built for businesses that want greater lifting comfort, reduced operating strain and smooth daily performance. With electric lifting and mechanical lowering, it delivers a reliable and user-friendly solution for demanding working environments.

- Electric high lifter
- Electrically lifts, mechanically lowers
- Supplied as standard with gel battery and charger
- Battery capacity can be displayed on your phone via Bluetooth

Stainless steel manual high lifter ML301

Also known as a scissor lift, ML301 is designed for businesses that want to combine transport and lifting in one efficient solution. It is designed to improve working height, support better ergonomics and ensure smoother handling throughout the working day.

- Manual high lifter
- Lifts up to 80 cm above floor level
- Also available with a 22 mm pump piston for faster lifting, but with a lower capacity
- Also available with quick lift

When standard is not enough

Not every lifting task fits a standard format. That is why Baltic Carrier also offers special solutions tailored to specific applications, workflows and industries. This includes pallet trucks with scale, special sizes and customized solutions developed around your exact requirements.

With Danish development, full in-house production and more than 50 years of experience, Baltic Carrier delivers solutions engineered to fit the task from the outset.

ML200 100% stainless pallettruck

ML300 100% stainless electric highlifter

ML301 100% stainless manuel highlifter
